WHO WE ARE

Together We Succeed is a community recruitment platform aimed at connecting talented individuals, with small and medium-sized enterprises in the local community.

The idea began in 2014, when a budding young entrepreneur, studying Business Entrepreneurship and Innovation at the University of Greenwich, grew frustrated at the lack of opportunities within the job market. Tired of the usual “lack of experience” rejection emails, coupled with minimal work experience due to studying, something had to change.

Through discussions with SMEs across London, the most common problem was the lack of avenues to hire talent and that was it, Together We Succeed was born! Alongside further studying for a Master’s degree, TWS grew from an idea into reality when the company became incorporated in 2017.

MISSION AND VISION STATEMENT

Our mission is to aid young people into becoming productive and engaged citizens. We power the world of job opportunities and help the communities in which we live. Also, we aim to provide a platform that adds value and not complication for local SME’s who want to open their doors to skilled and talented young people with the aim of growing and improving their business.

The vision is to connect young people and job opportunities together as we help communities prosper.

CAUSE

Together We Succeed is a community platform with social good at the centre of our aim and ambition. We have provided a platform where talented individuals can showcase their skills and talents to gain employment and job opportunities within SMEs in the local community. Aiding personal and professional growth for young people and to restore faith in the job market. Also, SMEs will have a cost-effective solution to growing their workforce and business with talent on their doorstep.

CULTURE

Together We Succeed is a platform that prides itself on social good and community togetherness for the betterment of all involved.

The platform was created to give the user control of how they want to use the platform. Candidates can upload videos of their skills and talents and SME's can project their businesses culture and ethics through the site to attract the best candidates.

REASON

You may be wondering why we are doing this? I am a Bachelors and Master's graduate and I have found it very difficult to develop myself personally and professionally through employment. I am no stranger to receiving the dreaded rejection emails and losing faith in the job market. With Together We Succeed the avenue has been created for social good and community togetherness. The underlying aim is to provide opportunity and for talent and business to thrive together.

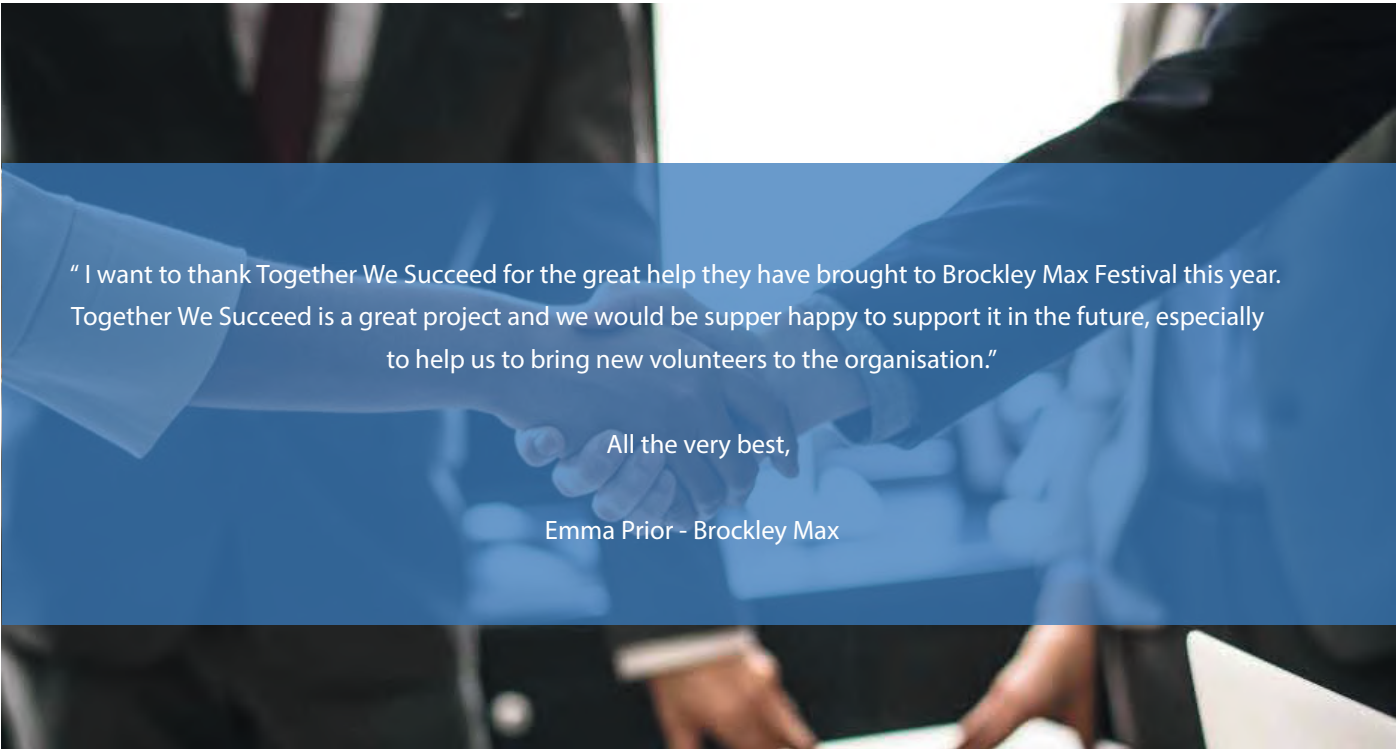

TWS enables talent to develop professional relationships and increase their industry knowledge, through work experience and allows their talent and qualities to be recognised in the workplace with opportunity.

SMEs are able to job listings, easily sort candidates based on industry and skills and are given access to the most ambitious, young talent within their community at a cost-effective price, not matched by recruitment agencies.

TWS is a platform which benefits both young talented people and businesses, leading to enhanced community togetherness and increased social development for all involved.

Together We Succeed – Where employers and employees thrive, together.

“ I want to thank Together We Succeed for the great help they have brought to Brockley Max Festival this year. Together We Succeed is a great project and we would be super happy to support it in the future, especially to help us to bring new volunteers to the organisation.”

All the very best,

Emma Prior - Brockley Max
